

DELIVERABLES

WP1

D1.1 Evaluation report

D1.2 Bank statements, accounting reports and procurement documentation

D1.3 Final report of the project

WP2

D2.1 Diving equipment

For the needs of the AqUA project, we acquired:

- 5 sets of regulators
- 5 diving suits
- 5 sets of boots
- 5 diving computers
- 5 BCD (jacket)
- 5 sets of fins
- 5 diving masks
- 5 diving tanks

5 sets of diving equipment. One set consists of a regulator, a bottle, a diving computer, a suit, jacket, fins, boots and a mask

D2.2 Underwater photography equipment

For the needs of the AqUA project, we acquired:

- 2 sets of underwater housings (housing, arms for flashes, vacuum alarm)
- 1 pc wide angle port
- 1 pc macro port
- 2 pcs Strobes
- 2 underwater lights
- 2 cameras

DELIVERABLES

2 sets of underwater photography equipment. One set consists of a camera, lenses, housing with ports, strobes and lights

D2.3 Educative underwater trail

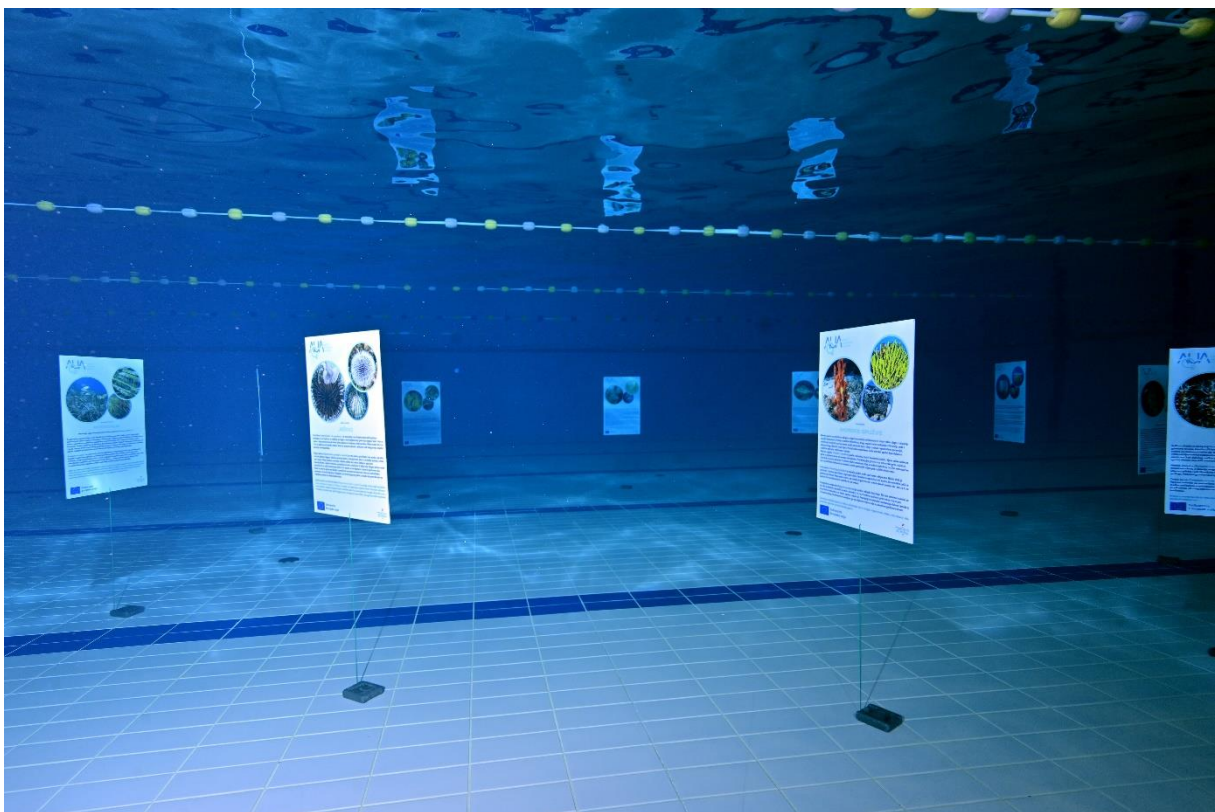

Educative underwater trail installed for all participants-divers and all other interested in underwater world.

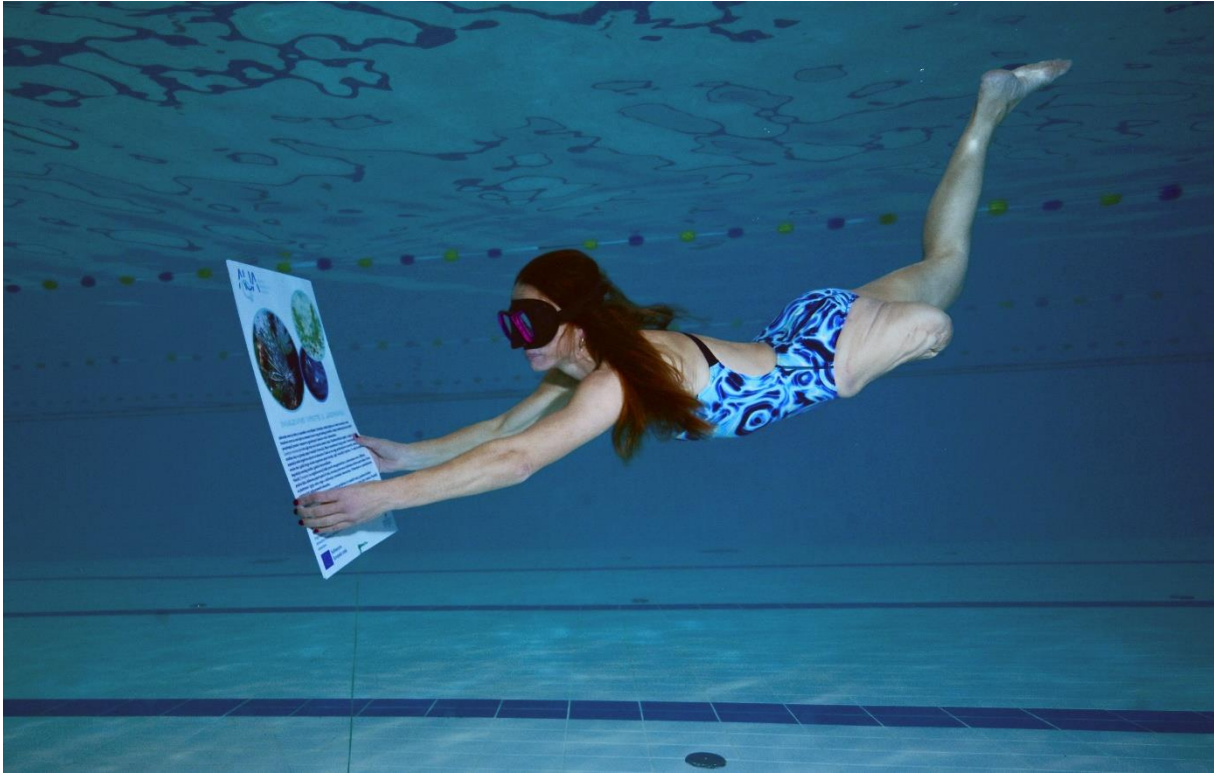

DELIVERABLES

WP3

D3.1 Trained and educated participants of discovery diving courses

We did 117 discovery dives. We did discovery diving twice in camp Bale, Kraljevica, Komiža on the island of Vis, and at the pools in Stubičke and Krapinske toplice and Jelkovec.

In addition to discovery diving, participants also had the opportunity to view the educational trail that we laid on the seabed and in the pools. One part of the discovery diving was done with children with special needs, which was the most demanding part of this project. All of them managed to dive successfully and enjoyed the new experience and the educational workshops in which they received more information and knowledge about the biological diversity of the sea.
